CAREER OBJECTIVE

Full stack web developer with 7 years of experience specializing in PHP/Laravel, relational databases (MySQL, PostgreSQL), and cloud services (AWS S3, SQS). Comfortable across the entire stack — from designing robust backend systems and integrating third-party APIs to building responsive UIs with Vue.js, Tailwind, and Bootstrap. Experienced in agile workflows and quality-focused development through automated testing with Pest and Dusk. Looking to step into a senior role and take on greater technical ownership.

EXPERIENCE

Piestar, Inc.

2022-2026

Software Developer

- Integrated legacy publications form with a robust PubMed search and import workflow
- Led a system-wide refactor which aimed to deduplicate form submissions and reduce user workload
- Created Filament dashboards with custom queries consolidating complex form builder system data
- Extended the form builder system to support surveys with admin-facing data visualizations
- Improved non-technical staff efficiency by redesigning an internal data management tool into a streamlined dashboard

Queensboro Shirt Company

2017-2020

Junior Web Developer

- Thwarted an ongoing cyber attack by discovering a security vulnerability which allowed the execution of user-uploaded scripts
- Integrated Amazon SQS and API endpoints to bridge legacy and greenfield applications
- Created and scheduled automated jobs to handle daily tasks
- Assisted in interviewing and mentoring new developers

EDUCATION

University of North Carolina at Wilmington

2010-2016

Bachelor of Science (Computer Science)

Wilmington, NC

Cape Fear Community College

2008-2010

Associate in Science

Wilmington, NC
